SINGER

Case: Phone Book

ABC company handles employee phone books manually. They are finding a solution for maintaining employee contact details.

A system is required to,

1. **User Login** – *Optional*
2. **Home** – Landing Page with well oriented design.
3. **Employee** – *Maintain employee contact details. (Add, Search, Update and Delete)*
    a. *Employee No (given number)*
    b. *Employee Name*
    c. *Gender*
    d. *Department*
    e. *Position*
    f. *Mobile*
    g. *Phone*
    h. *Email*
    i. *Fax*
    j. *Picture*
4. **Department** – *Maintain department details. (Add, View, Update and Delete)*
    a. *Department Id*
    b. *Department Name*
5. **Position** - *Maintain position details. (Add, View, Update and Delete)*
    a. *Position Id*
    b. *Position Name*

Develop suitable solution for the ABC Company.

- **Netcore Web App** / My SQL Server / Visual Studio
- Any tools and technology for mobile app
- Template use if possible
- CRUD operation and API call will be critically evaluated.
- Need to retrieve employee image URL from following Rest API.

URL	https://apps.singersl.lk/tech/getemployeeimage.php
Http Method	GET
Parameter	employee_no

Response body	{
	"employee_no": "7863",
	"picture": "https://url/image.jpg"
	}
